

MULTI-VIEW DATA

Data captured from multiples perspectives or modalities, providing different views of the same underlying phenomena or objects.

SOURCE-BASED

The focus is on the origin or source of each view.

SENSOR

The focus is on the physical devices or sensors collecting the data.

PLATFORM

The focus is on the software or hardware platforms collecting the data.

HOMOGENOUS

Data captured from the same sensor.

HETEROGENOUS

Data captured from different sensors.

MODALITY-BASED

The focus is on the type of data in each view.

SINGLE-MODAL

Data representing one form of data.

MULTI-MODAL

Data representing different forms or modalities of data.
